

1	sw6ml schema	3	6	Use cases	Version 0.2,missing validation	Completed
2	Database Design	1	0,5	ER-diagram	Version 0.2 implemented	Completed
3	Database Installation	5	0,5	No errors		Completed
4	Database: Dokumenter Design	-	4	ER-diagram + text		Completed
5	Tomcat installation på server	5	2	No errors	Waiting for IST	Completed
6	Server Data I/O	2	10	ping -> pong	Must be secure (SSL suggested)	Completed
7	Crud db Connections	3	meh	Data in database		Completed
8	Crud: Create	3	5	Data in database		Completed
9	Crud: Read	3	5	Data in database		Completed
10	Crud: Update	3	5	Data in database		Completed
11	Crud: Delete	3	5	Data in database		Completed
12	Web Interface: Gui Design	4	20	Visual	Focus on performance	Completed
13	Web Interface: Crud Management	4	10	Visual + Data in database		In progress
14	Test app: Gui Design	6	20	Visual	No need for eye candy	Not started
15	Test app: Crud mng. via Admin layer	6	8	Visual + Data in database		Not started
16	Testing	-	60			Completed
17	Report skrivning	-				In progress
18	Setup Server	1	???			Completed
19	Xml parser	3	10	Show it works!	Check for automated tools, alternatively, implement as visitor	Completed
20	Define transmission package	1	4	Show the definition	Package standard	Completed
21	Make the IOHandler SSL	3	4	Show it authenticates	IOHandler is currently normal and it needs to be SSL	Not started
22	Document the design	5	8	Present the design	Diagrams and charts	Completed
23	Document the architecture	5	8	Present the architecture	Diagrams and charts	Completed
24	DB: auto pk + auto inc	4	2	DB consistency		Completed
25	Update DB to requirements	1	5	Present the diagram	Update the DB to the new requirements	Completed
26	Update sw6ml to match DB	2	3	Present the document	Update the sw6ml to match the newest DB version	Completed
27	Create Savannah data api	3	8	Show to admin group	Implement an api for creating well formed transmission packets to the server.	Completed*
28	Server Controller	3	2	Present impl. modules	A server "main" class of sorts	Completed
29	Uber eyecandy web-interface design	10	???	Show it	A beautiful interface for the web-interface	Not started
30	Architecture for Web-interface ServerSide	5	6	Show it	UML/Class diagram, possibly flow diagram.	Not started
31	App plugin system til web interface	8	12		Snak med wombat	Not started
32	Nice and clean database design	1	5			Completed
33	Server: Folder system	5	12		How files are going to be organized	Not started
34	Synchronize server DB & device DB	7	25	Show data consistency	How can we achieve this ?	Not started
35	Update web interface to requirements from contact person	1	5	Show the new design		Not started
36	Implement the web interface on tomcat	2	20	Present the interface		Completed*
37	Server: logfile module	9	5	null	Logging commits, requests, and pings ?	Completed
38	Profile: add	3	8	Add profile		Completed
39	Profile: edit	3	8	Edit profile		Completed
40	Profile: delete	3	8	Delete a profile		Completed
41	QR code generation	3	8			Completed
42	Picture: add	3	8	Add a picture		Completed
43	Picture: delete	3	8	Delete a picture		Completed
44	Picture: permissions	4	3			Completed
45	Picture: links	5	8	link a sound to the picture		Completed
46	Picture: tags	4	8	Add a tag to a picture		Completed
47	Tags: add	3	8	Add a tag to a picture		Completed
48	Tags: search	4	8	Search for a tag		Completed
49	Tags: delete	6	8	Delete a tag		Completed
50	Audio: add	3	8	Add an audio		Completed
51	Savannah XML outputter (Requests)	2	8	show it?	XML outputter for requests	Completed
52	Audio: search	4	8	Search for audios		Completed
53	Audio: delete	3	8	Delete an audio		Completed
54	Audio: tags	4	4	Add tags for an audio		Completed
55	Settings: parse xml	7	10			Not started
56	Settings: edit	7	10			Not started
57	Settings: save	7	10			Not started
58	Stats	8	12			Not started
59	Make the server work with admin					Not started
