Preface

Quotations are the words of another person along with a source. The source of the citation will either be in the text immediately before or after, or could potentially be incorporated into the quote as shown in the example below:

“ This is an example of a quotation. ”

— X, p. Y

References are references to sections, figures, code snippets, chapters or parts written elsewhere in the report. This could look like the following:

This is explained in Section X.Y.

Code examples are written in a special environment so they are easy to read and recognize. Examples can be seen in Code snippet 1. Whenever there is a sequence of three dots (“...”) in a code snippet, it means that we have omitted some content, which is not important in that specific context.

```
1 #include <stdio.h>
2
3 main()
4 {
5     printf("Hello World");
6 }
```

Code snippet 1. Code example of a hello world program written in C.
